EVOC FALL/WINTER (F/W) 2019

Travelling is our heritage.
For sports, business or
just out of curiosity.

This means: taking all kinds of gear to
sometimes remote locations, using various
means of transportation.
Everything needs to be securely stored,
well organized and easy to handle.

On location, especially in the mountains,
safety and ergonomics become the ruling
factors for your gear. We know about all of
this from our own experience, and make all
our products with precisely that in mind. No
compromises in functionality and quality.

And always a bit more than simply pieces
of equipment.

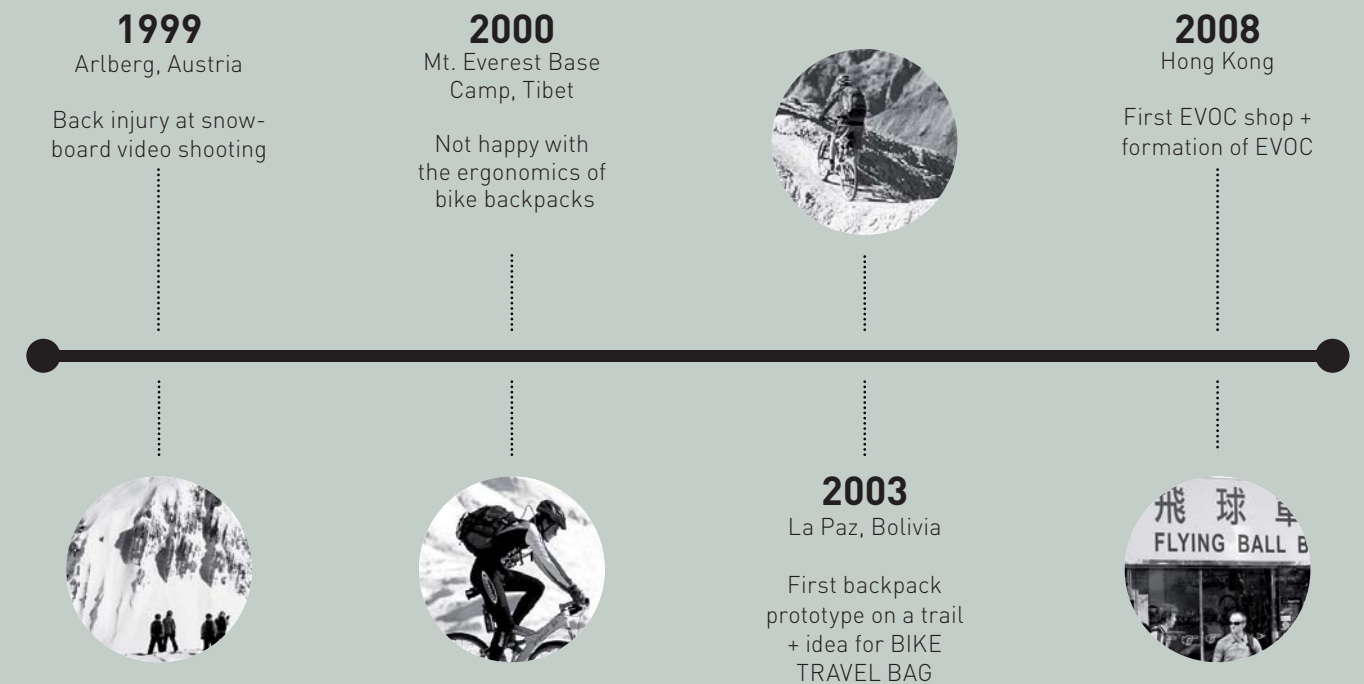

40 COUNTRIES IN 15 YEARS

In the last 15 years we have travelled to more than 40 countries. With our mountain bikes or snowboards, in search of the best trails and the most stunning powder runs – for magazines and photo shoots, with professional photographers.

After an avalanche accident while shooting a snowboard video in **1999**, former freeride pro Holger Feist came up with the idea of a backpack with integrated back protector. The incident did not involve burial and did not have serious consequences. Holger did, however, injure his back as a result of the avalanche shovel in his backpack when he crashed in a couloir.

The concept of a back protector also seemed to make sense for mountain biking, particularly as the ergonomics of the bike packs at the time left much to be desired. "Like a football on your back!" is how Holger summarised it in **2000** after a three-week bike expedition through Tibet, to Mount Everest Base Camp. So we started to tinker, sew and experiment, until the first functioning backpack prototype was finally initiated in **2003**, on the trails of La Paz. But an entirely different problem emerged in Bolivia, one for which a sensible solution was not yet available on the market: the bike that had been carefully packed in a box, came off the baggage carousel at La Paz airport in tattered packaging and in all its individual parts. Fortunately everything was still there, but this was obviously a reason for developing a sophisticated bike travel bag, as well.

Right from the start, the focus was on maximum functionality and quality so as to ensure that worrying about gear was going to be a thing of the past once and for all.

Both products were initially produced only for our own travels and for friends who requested them. Until one day, we had a phone call from a friend and long-term travel companion, Bernd Stucke from Hong Kong. He had taken his bike for a service at the legendary "Flying Ball" bike shop in one of the very first bike bags. Bike mastermind and shop owner Mr Lee was so impressed by this bike travel bag that he immediately ordered 50 bags. And that was to be our first "real" customer.

So in **2008** we founded the EVOC brand.

Since then a great deal – and yet only very little – has changed for us. We continue to rely on quality and functionality without compromise, while setting trends in design, comfort and safety. We still travel as much as possible all over the world with our sports equipment – and, meanwhile, more and more frequently also with our business luggage.

We test all our products ourselves and invest a lot of time and energy in further perfecting everything – down to the smallest detail.

Every product reflects our passion for our sport and our passion for what we do. As a result, EVOC products are always a little more than simply pieces of equipment.

EVOC stands for evolution and the concept of high-quality, sporting backpacks, bags and luggage – with a special focus on protection.

Protect the things you love!
Or in short: EVOC – PROTECTIVE SPORTS PACKS.

 - Bernd Stucke, Founder - Holger Feist, Founder - Jan Sallawitz, Marketing

Amazing lights, incredible landscapes – and an incredibly intense smell of fish. It feels like a mixture of old chewing gum and dried out toothpaste in my mouth and the taste is like very, very, very old Munster cheese dipped in fish sauce.

Hákarl! What could have been the sound of the chunk of extremely questionable food leaving my mouth, is the name of a very traditional Icelandic meal: fermented shark! Welcome to Keflavik, the international airport of Iceland and starting point for our mission through great Northern landscapes. Holiday? Vacation? Back in the days those terms meant shutting down the office for some time off for pure personal enjoyment. No mails, no calls, no meetings! It's a bit different for me today, as my passion to travel became my job: I'm just standing in this little scenic restaurant in Grundarfjörður with a piece of rotten shark in my mouth when the telephone rings. The office back home needs approval for a new product. Vacation is work and holiday is travelling! Quickly get the computer and check the spreadsheet. The others fix the luggage onto the roof of the oversized Defender Offroader in the meantime. We need to go to Kirkjufell, well-known among "Game of Thrones" fans – a very scenic spot. Richard, a professional sports photographer wants to check for motifs there and freeski pro Sven is looking for new locations for his upcoming project. Bernd and I, as the founders of EVOC are always looking for great destinations, and need to use any opportunity to test out our products in action. Hurry – the weather is about to change and the discovery plane is waiting! Countercheck with the office if they have all the information they need about the new product line. The car quickly turns into a conference room and production office at the same time. Recharge the battery of the tablet to check the pics of the shoot yesterday. Everything on track? Great, let's go!

MISSION SVEIT

— Iceland —

ALL EVOC PRODUCTS WERE PERSONALLY DEVELOPED AND TESTED BY US IN: NEPAL/IRAN/BOLIVIA/ARGENTINA/SCOTLAND/THAILAND/AUSTRALIA/NEW ZEALAND/CAMBODIA/SPAIN/JAPAN/KAMCHATKA/LEBANON/KENYA/TURKEY/CANADA/RUSSIA/France/HONGKONG/KASHMIR/AUSTRIA/ITALY/ROMANIA/CHILE/VIETNAM/TIBET/ECUADOR/USA/UZBEKISTAN/GERMANY/BALI/SOUTH KOREA/ALASKA/PATAGONIA/VIETNAM/LOFOTEN/TO BE CONTINUED...
EVOC TRIP 2018/ICELAND_

We are heading to our seventh location in the last three days and are in a constant check-in/ check-out mode. An ingenious packing system is key for having all the gear you need at hand at any time. Everything has to be well organized to keep the flow of the group going and to get our shot-list done. And the expectations are high, given the relatively short duration of the trip and the vastness of the country. At the same time, it's high season in the office back home and peak of the production cycle in the factories in Asia, so a lot of things need to be kept running while we try and get as much as possible out of our trip.

It's snowing now. Although it's spring time, the winter seems not to be over yet. What looked like a promising shortcut on the map turns out to be impassable in reality. Even for our Super Defender with extra big wheels the snow bank up here on the

pass is just too massive. We have to turn around. Alternative plan? Check out the great viewpoint a couple of miles back on the road, with this amazing ocean view. Richard wanted to shoot this location anyway. Office time for Bernd in the back of the car due to some urgent emails, while Holger is getting out the stove for a nice cup of outdoor coffee. Working nomadism in perfection. It's already afternoon when we arrive at the parking lot of our initially planned destination, Hellnar. From here we are going to fly over the Snaefellsjokull National Park. Sven has a pilot's licence and the little Cessna is waiting already. Quickly grab our stuff and hop on the plane. The view from above is breathtaking – Iceland is just an amazing place! And when the light turns right it's photoshoot time again and we have to be set up in minutes. The sun is coming out – get your gear and rider ready in 3, 2, 1...!

- Holger Feist - EVOC founder

Every place in the world has its very special colour scheme – this is the inspiration for our beautiful products.

To inspire your travelling, we choose some of the highlight colours for a selected line of products to form our **MULTICOLOUR EDITION**.

HIGHLIGHTS F/W 2019

EVOC's Fall/ Winter Collection 2019 (F/W 2019) is about **travelling** and **safety**.
2 NEW BACKPACKS: ONE FOR TRAVELLING AND ONE FOR SNOW

Our two new backpack highlights perfectly represent EVOC's travel and safety focus for 2019 – as is our custom, only the best when it comes to functionality and quality: The new MISSION PRO 28l takes you places in the most sophisticated way, and the new LINE R.A.S 20l/ 30l provides you with a very clever system for a huge extra in skiing and snowboarding safety.

Sophisticated multi-feature travel backpack for working nomads.

MISSION PRO 28l

This is your pack for better travelling. No matter whether it's only the daily commute to the city or a bigger trip to remote places, the new MISSION PRO 28l can handle anything.

Technically equipped like a true sports pack with all the features to make it a fully-fledged mobile office, this multi-purpose product reflects EVOC's history to a great extent: To go wherever you want and have all the gear you need with you – securely stored and easy to access thanks to extremely clever bag management.

The wide range of features meet all the needs of a working nomad lifestyle, and the high-end carry system guarantees optimum fit and comfort in any situation – be it in the mountains or the city.

EVOC's pack expertise in usability and carrying comfort for more snow safety: A new level of Avalanche Airbag Ready freeride and backcountry backpack.

LINE R.A.S. 30l & 20l

When you're in the mountains in wintertime, there is no room for failures. Your gear needs to be 100% reliable as even small issues might have bigger consequences. We know this from experience, and make all our packs with precisely that in mind – without any compromises in functionality, quality and safety.

We are therefore more than proud to offer the next level in safety by adding an Avalanche Airbag Ready freeride and backcountry backpack to our line. By incorporating **MAMMUT's Airbag Technology 3.0**, you now have a pack that combines EVOC's outstanding standard in pack design with one of the lightest and most flexible airbag systems. For more comfort, fit and safety in the snowy mountains.

protector// backpacks

Every one of our TÜV/GS-certified EVOC PROTECTOR BACKPACKS (FR) combines the benefits of an elaborate sports backpack and a fully-fledged back protector. Not only does the pack help prevent injuries from falls, it also boasts a number of useful features, that allow you to concentrate 100% on your sport.

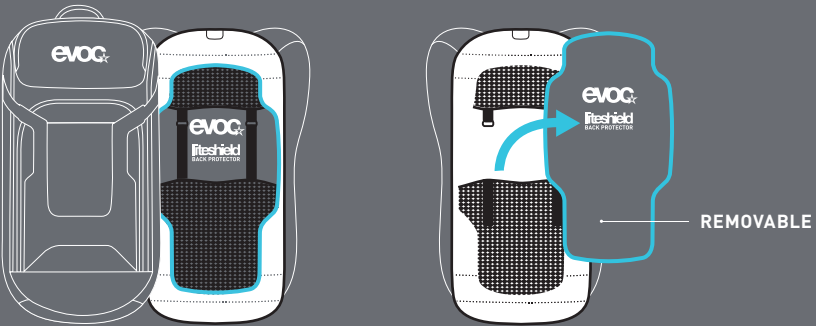

PRODUCTS

- 14 PROTECTOR BACKPACKS
- 26 TOURING BACKPACKS
- 34 AVALANCHE BACKPACKS
- 42 SNOW TRAVEL BAGS
- 48 TRAVEL
- 60 ACCESSORIES
- 72 PROTECTION WEAR

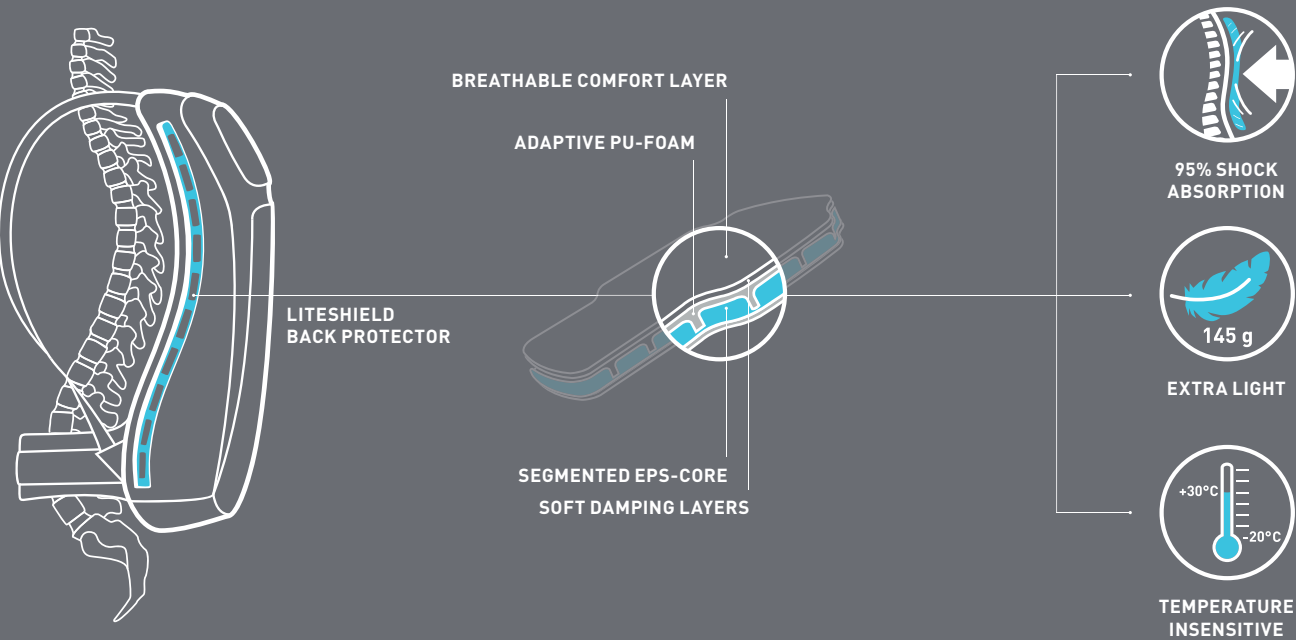

BACKPACK WITH INTEGRATED LITESHIELD BACK PROTECTOR

LITESHIELD BACK PROTECTOR

The EVOC LITESHIELD BACK PROTECTOR combines maximum protection against falls and a feather-light, highly effective construction with a great deal of flexibility. At the same time, it is completely impervious to temperature. As is the case for most sport helmet manufacturers, we use an EPS

construction, although ours is specifically adapted to back protection requirements by means of a segmented, multi-layer approach. Besides featuring excellent shock-absorbing properties, this protection concept enables fall damage to be identified immediately, so that the protector can be individually replaced.

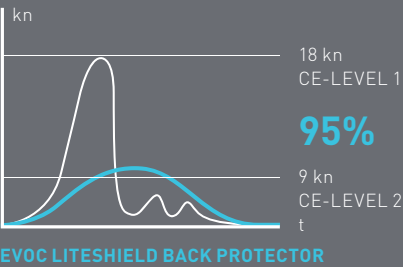

CE-NORM EN 1621-2 + TÜV/GS

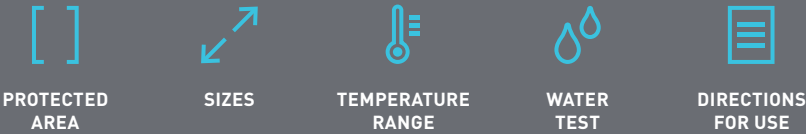

Materials and protective functions have been tested and certified by TÜV SÜD, according to EU norm 89/686/EEC for personal protective equipment (PPE), category 2. IN ADDITION, they have been certified in respect of product safety by TÜV/GS.

CE EN 1621-2 REQUIREMENTS

With a residual force value of only 9.75 kN, the EVOC LITESHIELD BACK PROTECTOR achieves a damping effect that is almost double than required. This means that about 95% of the impact force is absorbed! CE-Norm proved:

tuev-sued.de/ps-zert

ADDITIONAL TÜV/GS REQUIREMENTS

- Overhead stability test at full load (e.g. 20 l volume = 18 kg test weight!)
- Adjustment options
- Chemicals: Test of 18 harmful substances
- Independent inspection body
- According to the German Product Safety Law (ProdSG)
- Annual onsite product inspection

PROTECTOR BACKPACKS AVAILABLE IN 4 SIZES

XS, S, M/L, XL, depending on upper body length. EVOC offers more than 100 protector backpack models in all sizes and colours!

**FREE PROTECTOR
CRASH REPLACEMENT**

EVOC now offers a special customer service with the FREE PROTECTOR CRASH REPLACEMENT of all PROTECTOR BACKPACKS and PROTECTION WEAR products. Like helmets the LITESHIELD PROTECTOR is part of your personal protective equipment and protects vital parts of your body. It should be replaced after a serious crash.

LITESHIELD SYSTEM

The core component of the protector backpack system is the extra-wide, ergonomically shaped neoprene hip belt with Velcro fastening and a large heavy-duty buckle. This system transfers the main load onto the hips, namely right to the body's centre of gravity.

At the same time, the ergonomically cut shoulder straps keep the backpack comfortably in the predefined position to guarantee perfect back protection. Mesh elements, EVA foam with ventilation holes and a large, central ventilation channel ensure good air circulation.

LITESHIELD SYSTEM AIR

This system combines the essential back proximity for a back protector with maximum back ventilation. The back area is close fitting and features a large, central ventilation channel as well as two rows of "ventilation grids": air mesh-covered EVA foam strips with ventilation holes and a special gabled groove reduce the contact surface on

the back, which improves air circulation. The extra-wide, ergonomically shaped hip belt is made from our AIRO FLEX material. In this way, the main load – even in the case of a fully loaded backpack – is transferred to the hips, where it is fixed, while optimum breathability is ensured.

AIRO FLEX

AIRO FLEX

AIRO FLEX is an extremely sturdy material that is both permeable and flexible. We use it for our top-quality hip belts to

ensure optimum load transfer to the hips, with simultaneous maximum ventilation – for utmost carrying comfort.

The FR GUIDE BLACKLINE combines the proven technology standard of our PROTECTOR BACKPACKS with the revolutionary LITESHIELD SYSTEM AIR for maximum ventilation in a top-notch freeride backpack.

FEATURES

touring// backpacks

The backpacks in our TOURING range are true all-rounders. The high-quality NEUTRALITE SYSTEM makes them a perfect partner for any kind of mountain adventure.

TOURING BACKPACKS TECHNOLOGY

NEUTRALITE SYSTEM

Our NEUTRALITE SYSTEM stands for a neutral and light carrying feeling of our backpacks.

The weight distribution follows the concept of body hugging to keep the pack in position – even during action-loaded

manoeuvres: Via segmented and strategically positioned back padding elements the load is transferred through well padded, ergonomically shaped shoulder straps onto a wide hip belt to the body's centre of gravity.

AIR CIRCULATION

AIR CIRCULATION is used in all our backpacks, as it ensures optimum ventilation while preventing excessive cooling down of the sensitive kidney area, even during extremely high-strain activities or intensive perspiration.

Constant, free air circulation is guaranteed as a result of the vertical air channel.

Gaps along the sides of the channel allow additional air to escape.

BODY HUGGING

BODY HUGGING

The distinguishing feature of EVOC's "Body Hugging" fit is that the backpack's centre of gravity is positioned as close to the body as possible, and the load is distributed over a large area and transferred to the hips.

Optimised linking of the shoulder straps and the wide hip wings that "grow out" of the back part ensure that the backpack remains firmly in position during any kind of activity – for more comfort and control.

TOURING BACKPACKS

MAMMUT AIRBAG SYSTEM

Removable Airbag System 3.0: In the event of an avalanche, pull the deployment handle to inflate the avalanche airbag. This increases the chance to stay on the surface of the snow. By incorporating MAMMUT's Airbag Technology 3.0, you now have a pack that combines EVOC's outstanding standard in pack design with one of the lightest and most flexible airbag systems.

MAMMUT ACCESSORIES
SOLD SEPARATELY THROUGH MAMMUT

MAMMUT R.A.S. SYSTEM

The Removable Airbag System 3.0 is an avalanche airbag system based on a square, brightly-colored airbag that deploys behind the wearer's head within seconds. The new system is safe and easy to use. It is even lighter and smaller than before and can be attached to all Removable 3.0-compatible backpacks.

EVOC RETAIL PROGRAM

Today, retail is facing completely new challenges.

What consumer expect from brick and mortar shops is a great variety of products and immediate availability. An optimal product presentation and pleasant shopping environment help the customer make a good purchase decision.

Consistent communication and brand message give the buyer a feel of safety when buying a high quality product.

This is why EVOC offers retailers a specific retail programme, including sales promotion concepts and measurements. Adding to the programme offer are presentation aids, displays, and sales tools.

Please contact your distributor for more information or write to info@devocsports.com

MATERIALS

We exclusively select the materials for our products or develop them ourselves according to our requirements.
A basic prerequisite for use in our products is low weight combined with outstanding material characteristics. Functionality and quality are however always decisive in the selection decision.

OUTER MATERIALS

You could summarise the must-haves for perfect outer material for backpacks and bags in four words: durable, abrasion-resistant, water-repellent and lightweight. And this is precisely what nylon offers. Depending on the area of use of the product, we work with various nylon fabrics that differ in weave and fibre strength to optimally support the product's functionality.

N210 D RIPSTOP
N100 D BOX RIPSTOP
N210T TAFETTA PU 1500
N/P 465 D

N420 D (NYLON)

P600 D (POLYESTER)

Familiar to us from high-quality functional bike jerseys, Lycra Jersey is the perfect outer material for our protection vests thanks to its optimal moisture management and breathability characteristics.

LYCRA JERSEY

Some EVOC products have a high degree of water-resistance. These are made of our EVOC TARPAULIN, an innovative and environment-friendly material with excellent characteristics: PVC-free, extremely heavy-duty, very lightweight, waterproof and temperature-resistant.

TARPAULIN 1000D (EVOC TARPAULIN)

INNER MATERIAL

We use polyester fabrics for the lining of our backpacks and bags as it excels in low weight and high water-resistance. The materials' durability and stability also ensure low wear-and-tear on the inside, thereby increasing the lifespan of the product.

P200/D
WOVEN PE

REINFORCEMENTS AND PROTECTION

All our products, where the focus is on protection and comfort, incorporate high-quality materials for reinforcing certain sections. This increases the durability and lifespan of our products considerably. In addition, certain materials provide for extraordinary comfort thanks to their stabilising and shock-absorbing characteristics.

ATILON PE FOAM
N840 D

ATILON PE FOAM

NEOPRENE

FABRICS

Excellent temperature regulation and shock absorption are the decisive properties of our hip belts. The fabrics we use here are mostly temperature-resistant to ensure uncompromising flexibility in both summer and winter conditions.

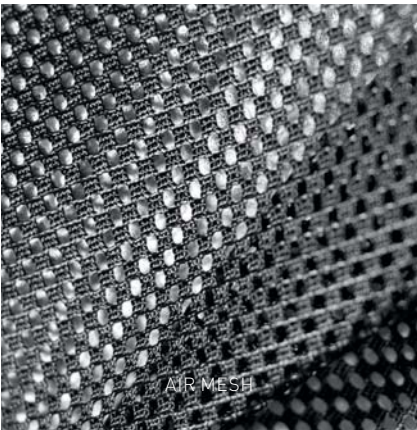

NEOPRENE
AIRO FLEX

AIRO FLEX

Heat and perspiration usually develop during high-strain activities. Optimal dissipation of both is what we demand from our ventilation materials. The fabrics we use are highly functional: They enable the air to circulate while avoiding moisture absorption. In addition to this, the surface structure is extremely smooth, making it skin-friendly and comfortable to wear.

AIR MESH
3D AIR MESH
AIRBREATH MESH
HONEYCOMB MESH
SPANDEX

MATERIALS

EVA TARPAULIN MESH (PVC FREE)

HYPALON ZIPPER GARAGE

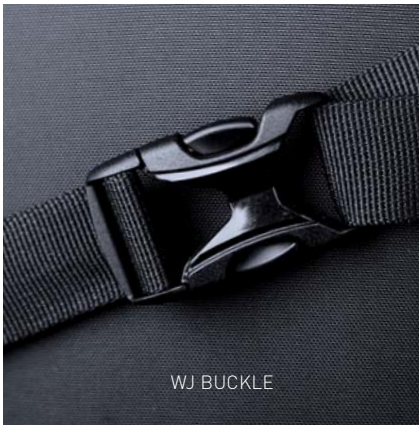

YKK ZIP

FEATURES AND ACCESSORIES

We exclusively use high-quality accessories that support our products' functionality, thereby creating added value to the design. Where we don't find suitable accessories for our equipment we simply develop them ourselves.

- YKK PLASTIC ACCESSORIES AND ZIPS
- WJ PLASTIC ATTACHMENTS
- HYPALON ZIPPER GARAGES
- NON STICK VELCRO
- EVA TARPAULIN MESH (PVC FREE)

WJ BUCKLE

TREATMENTS AND FINISHES

By adding high-quality coatings and finishes to our materials, we achieve a longer lifespan and higher quality for our products. The coating of our lightweight base materials provides for moisture protection and abrasion resistance.

- PU COATINGS
- PVC-FREE TPU COATINGS
- WATER-REPELLENT COATINGS

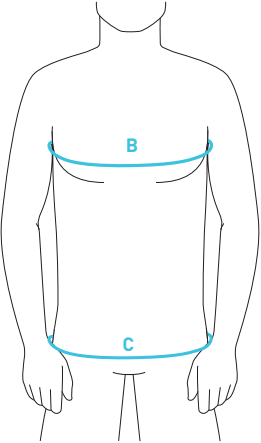

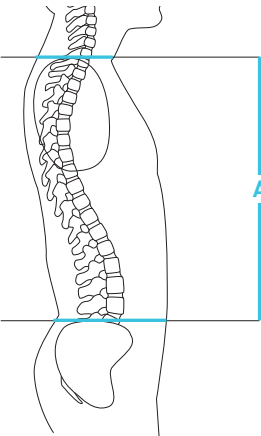

Polygiene is a special treatment, where silver ion is applied to the fabric to prevent the growth of micro-organisms, such as bacteria and fungi. This minimises odour development, skin irritations and the risk of acromycosis. Polygiene-treated products also protect the environment because they need to be washed less often and have a longer life expectancy.

POLYGIENE

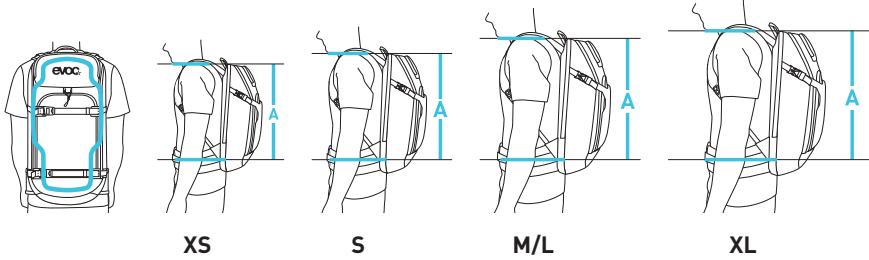

SIZE GUIDE

HOW TO MEASURE

TORSO LENGTH **A** is critical for ensuring optimal protection. When calculating your own torso length, measure from the top of your hip to your shoulder.

PROTECTOR BACKPACKS

SIZE	TORSO LENGTH A	HIP BELT AMOUNT
XS	27 - 38 cm	up to 94 cm (flex. to 100 cm)
S	38 - 43 cm	up to 99 cm (flex. to 105 cm)
M/L	44 - 50 cm	up to 109 cm (flex. to 115 cm)
XL	51 - 56 cm	up to 111 cm (flex. to 117 cm)

PROTECTION WEAR

MEN	TORSO LENGTH A	CHEST AMOUNT B	HIP AMOUNT C
S 44/46	38 - 43 cm	87 - 93 cm	92 - 97 cm
M 48/50	44 - 47 cm	96 - 102 cm	98 - 104 cm
L 52/54	47 - 50 cm	101 - 109 cm	106 - 111 cm
XL 56/58	51 - 56 cm	110 - 118 cm	112 - 120 cm

WOMEN	TORSO LENGTH A	CHEST AMOUNT B	HIP AMOUNT C
S 34/36	38 - 40 cm	84 - 88 cm	85 - 96 cm
M 38/40	40 - 43 cm	87 - 95 cm	96 - 102 cm
L 42/44	44 - 50 cm	95 - 102 cm	102 - 109 cm

KIDS	TORSO LENGTH A	BODY HEIGHT
JS	27 - 32 cm	122 - 130 cm
JM	31 - 37 cm	130 - 143 cm
JL	38 - 43 cm	143 - 164 cm
